

# Programming Assignment 1 (Windows )

2021/03/18 by Gi-Luen Huang

# CPP file error

- In windows system, The format of the read file must be **char** type.

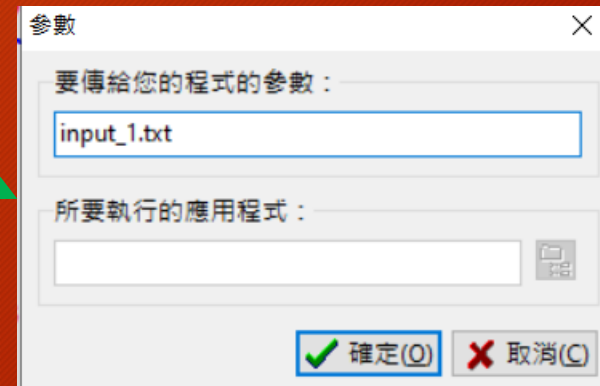

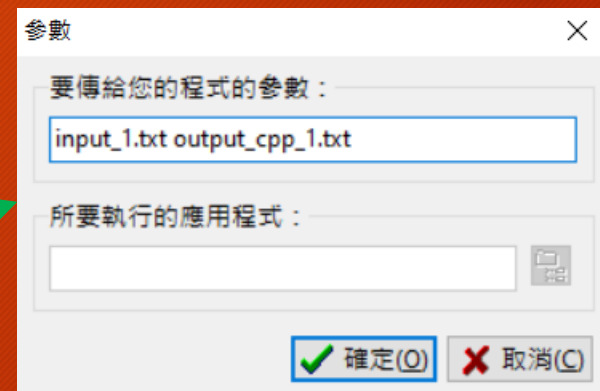

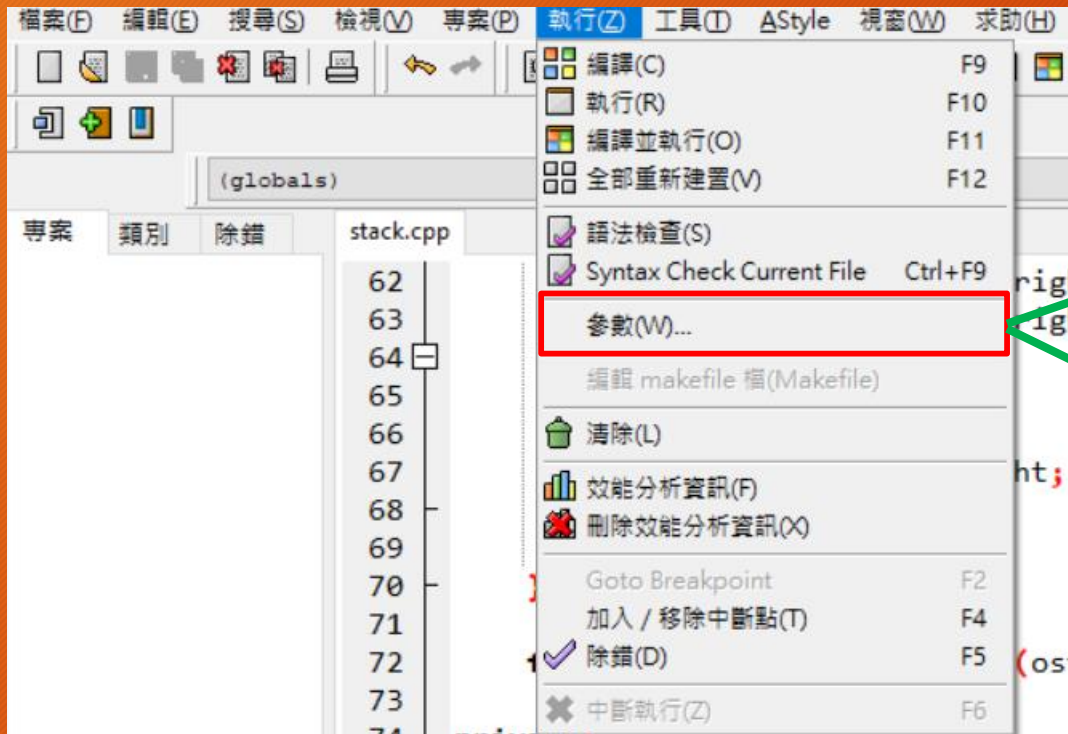

```
126 | ifile.open(ifile_name);  
127 | if(has_ofile){  
128 |     ofile.open(ofile_name);
```

▲Original

```
126 | ifile.open(ifile_name.c_str());  
127 | if(has_ofile){  
128 |     ofile.open(ofile_name.c_str());
```

▲After modified

# DEV-C++ pass parameters

# Evaluation (Correctness and Time Complexity)

- Command line argument for correctness:
  - `python stack.py --input input_1.txt --output output_py_1.txt`
  - `./stack.exe input_1.txt output_cpp_1.txt`
- Command line argument for time complexity:
  - `python stack.py --input input_1.txt`
  - `./stack.exe input_1.txt`
